

Preformed tubes

... come out of the corner and match any curve.

stand: 04/0215 photos: file Novoplast Schlauchtechnik GmbH - © www.fotolia.de

Advantages:

- Individually moldable as a 2D and 3D tube
- Fast assembly
- Narrower bending radii => 2.5 x tube OD guaranteed

Smallest bend radius 4x1x6 mm		
Polyurethane	Nylon	Preformed tubes
30 mm	25 mm	15 mm

- Complex geometric sizes possible
- Very good absorption properties
- Low weight in comparison to steel pipes
- noncorrosive
- Savings in tube sections, additional holders and connectors
- Reduction of sources of leaks

Applications:

- Pneumatic control line
- Lubricant line / delubricant tube
- Guide tube for rope pulls
- Coolant tube
- ... and all other small installation situations

Standard materials:

- Polyurethane
- Nylon

Standard color:

- Blue
- Black
- Natural

- Special materials and colors on request
- Technical test according to specific customer construction drawing

An individual solution for compact installation situations!
